

Activism against Gender-Based Violence

This month marks the **16 Days of Activism against Gender-Based Violence (GBV)**. Under the global theme “**Orange the World: End Violence against Women Now!**” the United Nations is marking the 16 Days of Activism against Gender-Based Violence, from **25 November to 10 December**. Individuals and organizations around the world call for the prevention and elimination of violence against women and girls.

To learn more about how you can join the campaign, go [here](#).

The official UN commemoration event will take place on November 24, 10:00– 11.30 am ET. To watch the event, please [register here](#).

Did You Know?

- **1 in 3** women and girls experience physical or sexual violence in their lifetime?
- **243 million** women and girls, aged between 15-49 experienced sexual/and/or physical violence by an intimate partner in the last year.
- Domestic violence is a global problem

Webinar

UN Women organized a **webinar on the shadow pandemic** on 18 November to discuss lessons learned on collecting data on violence against women during COVID-19 and how such data can be used to inform policy decisions.

Dr Anita Raj, GEH Director, moderated the discussion.

that affects **35% of women** worldwide.

GEH work on Gender-Based Violence

Measuring Gender-Based Household Maltreatment in Urban Slums of Mumbai, India

A new measure of gender-based household maltreatment (GBHM) by husbands and in-laws is during the perinatal period, which has been developed and tested in three major slum communities in Mumbai, India.

Machine Learning Analysis of Non-Marital Sexual Violence (NMSV) in India

NMSV in India disproportionately affects adolescents, is under-reported, and is not well understood or addressed in the country. Machine learning techniques can explore low prevalence data to offer insight into the identification of factors associated with NMSV.

Political Differences in American Reports of Sexual Harassment and Assault

Political ideology has been linked to beliefs regarding sexual harassment and assault (SH&A). This study examined associations of political identity and political ideology with self-reported experiences of being the victim of SH&A using data from the January 2018 Stop Street Sexual Harassment online poll.

Development of the Observer Intervention in Sexual Harassment at Work (OISH) Measure, Using a Situational Judgment Approach for Assessment

This study examined associations of political identity and political ideology with self-reported experiences of being the victim of SH&A using data from the January 2018 Stop Street Sexual Harassment online poll.

Blog

While misogynist attitudes and regressive gender norms deriding women's political participation are at the heart of the issue of online violence against women in politics (OVAW-P), the critical role of social media platforms in exacerbating this culture of misogyny must not be underestimated.
